JETimage^{NET} Software

Designed Exclusively for Contex Scanners

JETimage^{NET} is the complete copying software for Contex wide format scanners. The application is designed to unlock the full potential of your Contex scanner as only Contex software can. JETimage^{NET} supports most large format printers for high-quality copying, including HP, Canon, Epson, Xerox, Mutoh, and many others. JETimage^{NET} can be operated from both keyboard and/or touch-screen.

JETimage^{NET} copy software is the ultimate tool for professionals in reprographic and copy shops. It is designed especially for large format copying in regard to speed, flexibility and production of high quality color matched copies or cleaned-up monochrome copies.

Ideal for multi-function systems solutions with an easy-to-navigate touch-screen

Designed to work with any Context scanner

Features

- Vivid, high-quality color copies
- Clean, clear monochrome copies
- Precise color matching
- Scan-to-file
- Print-from-file
- Touchscreen compatible
- Scan, Copy, and Print to network

COPY

JETImage^{NET} is designed to be the ideal copying software for your Context wide format scanner. With full support for most wide format printers on the market, and unrivaled color matching, JETImage^{NET} can produce excellent results in both color and black and white with minimal setup and calibration required.

- > Simple, accurate closed-loop color calibration
- > Easy print job configuration for correct sizing and scaling
- > Editing tools: lightness, saturation, levels, sharpness, blur
- > Scaling options: scale to sheet size, by percent, or custom
- > Media profiles: for perfect reproduction on any media type

SCAN + PRINT

JETImage^{NET} is not limited to simple copying functions. JETImage^{NET} and your Context scanner can be used to SCAN images to file as well, even save as a PDF. And you can use JETImage^{NET} with your printer to PRINT saved files, with all the same controls over the printed output in the COPY mode.

- > Scan-to-File with full Context scanner control
- > Save files as PDF, JPG, TIFF, and many others
- > Print-from-File with a wide format printer
- > ICC color management support
- > Batch printing sends several files to the printer at once

NETWORK

With the WIDEsystem^{NET} scanner driver and control software installed, Context scanners can be shared on the network (just like a printer) with other users of JETImage^{NET} software. A simple configuration of WIDEsystem^{NET} and your scanner can be selected by others on the network as if it is locally connected.

- > Scan-to-Net: scan across the network to another PC
- > Use JETImage^{NET} with a scanner connected to a different PC
- > Scanner, PC, and Printer can all be located separately
- > Scanning/Copying/Printing over LAN or Internet
- > Designate a shared folder in WIDEsystem^{NET} for network scanning
